

*Industry Advisory from the Building & Safety Department*  
**Changes to the City of Las Vegas Website**  
**Effective April 4, 2016**

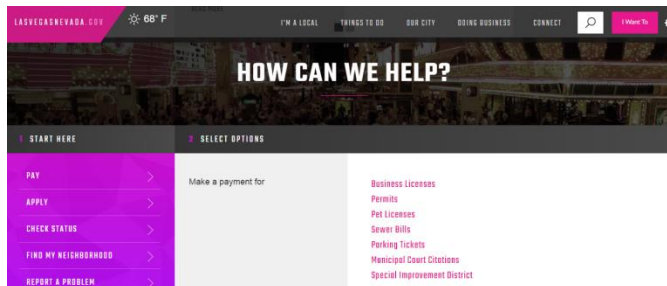

The City of Las Vegas has designed a new City website with the intent of making it easier for customers to find information. This is the first step in several changes that we are making for our online tools to provide better service.

*What is changing?* The look of the website is now more modern and iconic Las Vegas and the search tool bar will help you locate information faster. If you have links saved to your favorites, those links will have to be updated with the new website address.

*What hasn't changed?* The tools that we provide such as online over the counter permits, check status, scheduling inspections, online payments, online QAA (Quality Assurance Agency Agreement) and handouts are all still on our website.

*How do I get to the B&S information?* From the main City page scroll down to “Start Here” for links to pay, apply, check status or check if your project address is in our jurisdiction by going to “Find my neighborhood” and click on “Are you within City limits?”:

To get to the Building & Safety homepage, go to the top toolbar and choose “Doing Business & Building Permits” or “Our City” & “Government” then scroll down to “Departments” and click on “Building & Safety”.
