

## **Weekend Inspections Available to Contractors Effective July 23, 2013**

### *Industry Advisory from the City of Las Vegas Building and Safety Department*

Please be advised that we are adjusting our weekend inspection program to allow for all types of inspections to be scheduled for Saturday inspection. Previously those inspections that were permitted for Saturdays were restricted to hold over inspections, water heaters and other inspections that required a homeowner to be present at their home to enable the inspection. The restriction on hold over inspections is being removed and contractors may schedule regular inspection, except special inspections such as epoxy inspections that require significant amounts of time. Regular inspections can be scheduled for Saturday without the use of overtime. This is a part of our on-going efforts to provide premium customer service and take full advantage of our inspection capacity on weekends.

This change to our service will begin on July 23, 2013. It is our hope that our contractor customers will take full advantage of this expanded offering for inspections. Any questions please feel free to contact Chris Knight, Building Official at 229-6092 or Mike Bouse at 229-4888.

Sincerely,

A handwritten signature in cursive script that reads "Chris Knight".
