MANAGEMENT RESPONSE	8

AUDIT OF PUBLIC SAFETY DEPARTMENT FUELING TRANSACTIONS OVERSIGHT Report CW015-2021-06

BACKGROUND

The city's Fleet and Fuel Services Division (Fleet Services) of the Operations & Maintenance Department administers the city's fueling operations. Fleet Services oversees the operation of 19 city fuel sites. City employees utilize the fuel pumps at these fuel sites for fueling city vehicles and equipment.

The Department of Public Safety (Public Safety) staff utilize city fuel sites for fueling department vehicles and equipment. To access a city fuel pump, a plastic electronic fob known as a prokee must be placed into a slot at the pump.

All city vehicles have an assigned prokee that is programmed with that vehicle's information. These prokees are referred to as <u>primary prokees</u>. In order to access a fuel pump for fueling equipment without a designated prokee or for filling a gas can, city employees must utilize what is referred to as a <u>secondary prokee</u>. Considering secondary prokees are not assigned to any specific vehicle or piece of equipment, there is greater risk of fuel theft occurring with these prokees.

In order to obtain a secondary prokee, a city employee and their manager must complete and sign a secondary prokee request form (see Appendix A). This form requires the employee and manager to agree to comply with a list of rules documented on the form including "tracking all fuel disbursements" and the "reconciliation of disbursement logs." The *Small Equipment Fueling Operations Procedure (O&M-FS-FuelO2)* further explains that the departments are responsible for "recording all disbursements on a log sheet (see Appendix B) and for reconciling the log sheet against an automated monthly disbursement report provided by the Fleet Services Division."

Fleet Services currently generates 1) quarterly primary prokee fueling transaction reports and 2) monthly secondary prokee fueling transaction reports from the city's fueling system and emails these reports to city departments. According to the *Fuel Transaction Monitoring Procedure* (*O&M-FS-Fuel06*), departments are responsible for "reviewing reports for assigned units, identifying and investigating concerns, and for taking appropriate action for misuse of the fuel system by subordinate personnel."

During 2019, Public Safety had 7,782 primary prokee transactions totaling 67,809 gallons and three secondary prokee transactions totaling 10 gallons.

OBJECTIVES

Our audit objectives were as follows:

• To determine whether a secondary prokee request form signed by a current employee and manager exists for every secondary prokee issued to Public Safety.

- To determine whether Public Safety is maintaining a secondary prokee use log and reconciling the log to the monthly secondary prokee fueling reports.
- To determine whether Public Safety management is reviewing the primary and secondary prokee fueling reports from Fleet Services for irregular transactions and researching any identified irregularities.
- To determine whether use logs, reconciliations, and fueling report review documentation are being retained in accordance with the fueling procedures.

SCOPE AND METHODOLOGY

The scope of our work was limited to the management controls within the context of the audit objectives and scope of the audit. The scope of the audit was limited to the review of fueling logs, reconciliations, and fueling reports in calendar year 2019. The last date of fieldwork was March 11, 2020.

Our audit methodology included:

- Review of fueling policies and procedures
- Review of secondary prokee request forms
- Review of fueling reports issued by Fleet Services
- Interviews with city employees
- Testing of reconciliations of fueling use logs to fueling reports

We conducted this performance audit in accordance with Generally Accepted Government Auditing Standards, except for the requirement for an external peer review every three years. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides reasonable basis for our findings and conclusions based on our audit objectives.

FINDINGS, CONCLUSIONS, AND RECOMMENDATIONS

The following findings and conclusions to the audit objectives were noted:

A secondary prokee request form is on file with Fleet Services for Public Safety's one secondary prokee; however, the form is signed by an employee and manager who are no longer employed with the city. No secondary prokee use log is being maintained by Public Safety and accordingly, no reconciliation of a use log to the monthly secondary prokee fueling reports is being performed. (Finding #1)

The monthly and quarterly fueling reports provided to Public Safety are not being adequately reviewed for irregular transactions by Public Safety management. Documented evidence of this review is needed. (Finding #2)

Further information on these issues is contained in the following sections. While other issues were identified and discussed with management, they were deemed less significant for reporting purposes.

Contributors to this report included:

Radford K. Snelding, CPA, CIA, CFE City Auditor

Bryan L. Smith, CPA, CFE Internal Audit Section Manager

Gary L. Phillips, CFE Senior Internal Auditor

1. Fuel Use Log Not Being Maintained

Criteria

The Small Equipment Fueling Operations Procedure (O&M-FS-Fuel02) states the following:

In order to obtain assignment of a secondary unit prokee for general utilization (e.g., small equipment, rental unit, gas can), a user organization must complete and submit a "Secondary Prokee Request Form". The form allows the user to select all 3 fuel types for approval, plus define the daily limit of each type.

A secondary prokee will be assigned to a specific individual only, and that individual is responsible for the appropriate use of all gasoline dispensed using the prokee, for recording all disbursements on a log sheet, and for reconciling the log sheet against an automated monthly disbursement report provided by Fleet Services Division. Fleet Services Division recommends that individuals responsible for the secondary prokees be at a supervisory level or higher.

Managers are responsible for assignment of prokee responsibility to a specific individual and for ensuring that tracking logs are kept appropriately and are reconciled with monthly reports received from Fleet Services Division. Employees who are designated for assignment of a prokee are responsible for ensuring proper use of fuel disbursement, following operational processes and rules, maintaining adequate logs, and reconciling disbursements on a monthly basis.

Fueling operations of this type provide a potential for misuse and must be monitored and controlled. The reconciliation records are subject to review by Fleet Services Division or the Office of the City Auditor.

Tracking logs and reconciliation documents are under the control of the user organizations, and it is recommended they be kept for a minimum of one year.

The secondary prokee request form signed by an employee and their manager includes the following rules agreed to by each employee requesting a secondary prokee:

- User is responsible for tracking all fuel disbursements.
- *Respective management staff members are responsible for the oversight of fuel operations and reconciliation of disbursement logs.*

Condition

Considering secondary prokees are not assigned to a specific vehicle or piece of equipment, there is greater risk of fuel theft. Accordingly, Fleet Services requires departments to have an employee and manager sign a request form for each secondary prokee, to record usage of these prokees on a use log, and to reconcile the use log to the monthly secondary prokee fueling system reports. See the suggested use log at Appendix B.

Public Safety has one secondary prokee that was used only 3 times during 2019. A secondary prokee request form is on file with Fleet Services for this secondary prokee; however, the form is signed by an employee and manager who are no longer employed with the city. No secondary prokee use log is being maintained by Public Safety and therefore, no reconciliation of a use log to the monthly secondary prokee fueling reports is being performed. Despite the limited use of this secondary prokee, a use log should be maintained and reconciled in accordance with policy.

Cause

• Public Safety staff were not aware of the requirement to maintain a secondary prokee use log or to perform a reconciliation of the use log to the secondary prokee fueling reports from Fleet Services.

Effect

• Fuel theft may occur without detection.

Recommendations

- 1.1 Public Safety management working with Fleet Services should update its secondary prokee request form with signatures of the employee responsible for the secondary prokee and the manager responsible for oversight of this employee.
- 1.2 Public Safety management should document and implement department procedures requiring the use of a secondary prokee use log and the reconciliation of the use log to the monthly secondary prokee fueling reports. These procedures should require that any identified differences be researched and their resolution documented. The reconciliations should be signed and dated by the preparer and a manager who has reviewed and approved

the reconciliations. The procedures should also require that use logs, fueling reports, and reconciliations be retained for a minimum of a year to comply with fueling procedures.

2. Fueling Reports Not Being Adequately Reviewed for Irregularities

Criteria

According to the *Fuel Transaction Monitoring Procedure (O&M-FS-Fuel06)*, departments are responsible for reviewing the fueling reports for any irregular transactions:

The Fleet Services Division Manager is responsible for generating and sending the various reports to all departments. The respective managers for the various budget organizational numbers are responsible for reviewing reports for assigned units, identifying and investigating concerns, and for taking appropriate action for misuse of the fuel system by subordinate personnel.

Records generated by user divisions should be maintained for a minimum of 1 year.

Condition

The monthly and quarterly fueling reports provided to Public Safety are not being reviewed for irregular transactions and therefore, there is no documentation showing evidence of a review.

Cause

• Lack of established department procedures requiring the review of the fueling reports and the maintenance and retention of documented evidence of the review.

Effect

• Fuel theft may occur without detection.

Recommendation

2.1 Public Safety management should document and implement department procedures requiring that the monthly and quarterly fueling reports be reviewed by a manager for irregular transactions and that this review be documented. Documented evidence of the review should include a copy of the fueling reports along with the reviewer's notes on research into irregular transactions, the reviewer's signature, and the date of the review. Review documentation should be retained for a minimum of a year to comply with fueling policy.

MANAGEMENT RESPONSE

1. Fuel Use Log Not Being Maintained

1.1 Public Safety management working with Fleet Services should update its secondary prokee request form with signatures of the employee responsible for the secondary prokee and the manager responsible for oversight of this employee.

Management Action Plan:

A policy was developed to include a procedure to obtain a secondary prokee. In order to obtain a secondary prokee, the requesting employee must complete the "Secondary Prokee Request Form" which will be signed by both the employee and the manager. Authorized users of the secondary prokee will be reviewed/renewed on an annual basis. The secondary prokee will be stored in the key watcher system. The department will update its existing Secondary Prokee Request form to reflect the employee and manager responsible for the prokee.

Estimated Date of Completion: October 1, 2020

1.2 Public Safety management should document and implement department procedures requiring the use of a secondary prokee use log and the reconciliation of the use log to the monthly secondary prokee fueling reports. These procedures should require that any identified differences be researched and their resolution documented. The reconciliations should be signed and dated by the preparer and a manager who has reviewed and approved the reconciliations. The procedures should also require that use logs, fueling reports, and reconciliations be retained for a minimum of a year to comply with fueling procedures.

Management Action Plan:

A policy was completed in order to meet the audit requirements. The Detention division manager will review the monthly fuel report to ensure it matches the logs on file. Any variances will be researched and reported. The reconciled report will be sent back to the department designee and retained for a year. The final audit results will be reported to the Deputy Chiefs.

Estimated Date of Completion: October 1, 2020

2. Fueling Reports Not Being Adequately Reviewed for Irregularities

2.1 Public Safety management should document and implement department procedures requiring that the monthly and quarterly fueling reports be reviewed by a manager for irregular transactions and that this review be documented. Documented evidence of the review should include a copy of the fueling reports along with the reviewer's notes on research into irregular transactions, the reviewer's signature, and the date of the review. Review documentation should be retained for a minimum of a year to comply with fueling policy.

Management Action Plan:

A policy was established in order to meet the audit requirement. The department designee will send out the fuel report to the division Lieutenants in a format that will allow the Lieutenants to respond to all irregular transactions. The department designee will collect and review all responses and report the final audit findings to the Deputy Chiefs. The reports will be retained for a minimum of a year.

Estimated Date of Completion: October 1, 2020
