Fire Sprinkler Underground Lead-In Standard Detail Submittal Guideline

Scope

This guideline was developed to provide the Underground contractor a comprehensive list of items that shall be provided as part of a submittal for plan review and subsequent permitting.

1. Approved pertinent civil utility sheet(s)
2. Narrative scope of work letter detailing exact work to be done on Company letterhead. Must be signed with all contractor information
3. The CLV standard detail indicating sizes of pipes. If not using standard detail, you shall provide a contractor designed plan per State Contractor's Board requirements with all information.
4. Cut sheet of riser being installed
