

Fremont Street Experience Historical Sign

Grant	\$225,000
Organization	Fremont Street Experience LLC
Year	2019
	<p>The intersection of Fremont & Main streets is the historic center of Las Vegas. The intersection of the city's first main roads is where the railroad depot opened, and where the central business and hotel district began. As Las Vegas grew from a railroad community into an internationally known destination, Fremont & Main remained for decades among its most photographed and identifiable locations. In 2014, the construction of Slotzilla zipline on Fremont Street Experience included a landing structure near the intersection which blocked the famous eastward view of Fremont Street.</p> <p>The Centennial Commission reimbursed Fremont Street Experience LLC the amount of \$225,000 for the construction and installation of a "Historical Sign" on the west end of the landing structure. The sign, completed in March 2020, includes a vertical 430-square-foot split-flap style LED screen featuring a rotation of historic images of Fremont Street.</p>
