SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Las Vegas city, Nevada			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	219,187	+/-1,709	219,187	(X)
Family households (families)	137,879	+/-1,447	62.9%	+/-0.6
With own children of the householder under 18 years	62,727	+/-1,206	28.6%	+/-0.5
Married-couple family	91,948	+/-1,493	41.9%	+/-0.6
With own children of the householder under 18 years	38,646	+/-1,061	17.6%	+/-0.5
Male householder, no wife present, family	14,110	+/-692	6.4%	+/-0.3
With own children of the householder under 18 years	6,485	+/-544	3.0%	+/-0.2
Female householder, no husband present, family	31,821	+/-1,093	14.5%	+/-0.5
With own children of the householder under 18 years	17,596	+/-877	8.0%	+/-0.4
Nonfamily households	81,308	+/-1,586	37.1%	+/-0.6
Householder living alone	64,811	+/-1,423	29.6%	+/-0.5
65 years and over	21,657	+/-997	9.9%	+/-0.4
Households with one or more people under 18 years	71,035	+/-1,159	32.4%	+/-0.5
Households with one or more people 65 years and over	59,478	+/-851	27.1%	+/-0.4
Average household size	2.76	+/-0.02	(X)	(X)
Average family size	3.45	+/-0.03	(X)	(X)
RELATIONSHIP				
Population in households	604,915	+/-515	604,915	(X)
Householder	219,187	+/-1,709	36.2%	+/-0.3
Spouse	91,847	+/-1,476	15.2%	+/-0.2
Child	186,875	+/-2,474	30.9%	+/-0.4
Other relatives	59,682	+/-2,405	9.9%	+/-0.4
Nonrelatives	47,324	+/-2,042	7.8%	+/-0.3
Unmarried partner	17,033	+/-818	2.8%	+/-0.1

Subject	Las Vegas city, Nevada			
	Estimate	Margin of Error	Percent	Percent Margin of Error
MARITAL STATUS				
Males 15 years and over	243,261	+/-2,016	243,261	(X)
Never married	92,484	+/-2,209	38.0%	+/-0.7
Now married, except separated	106,010	+/-1,574	43.6%	+/-0.7
Separated	5,554	+/-590	2.3%	+/-0.2
Widowed	6,667	+/-554	2.7%	+/-0.2
Divorced	32,546	+/-1,081	13.4%	+/-0.4
Females 15 years and over	247,070	+/-1,735	247,070	(X)
Never married	76,805	+/-1,891	31.1%	+/-0.7
Now married, except separated	102,912	+/-1,567	41.7%	+/-0.7
Separated	7,290	+/-583	3.0%	+/-0.2
Widowed	20,846	+/-815	8.4%	+/-0.3
Divorced	39,217	+/-1,181	15.9%	+/-0.5
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	8,101	+/-701	8,101	(X)
Unmarried women (widowed, divorced, and never married)	3,224	+/-417	39.8%	+/-4.1
Per 1,000 unmarried women	38	+/-5	(X)	(X)
Per 1,000 women 15 to 50 years old	54	+/-5	(X)	(X)

With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data).

The effect of nonsampling error is not represented in these tables.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using 2013 data or multi-year data containing data from 2013. For more information, see: Language User Note.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
